

These luxurious bath accessories have a translucent quality and a touch of shimmer created by seashells that have been ground and added to resin. Hand-crafted and imperfect in shape and coloration, St. Clair has a wonderful organic quality that will be a lovely addition to any bathroom.

### Maintenance & Important Considerations

- Hand wash with mild soap and water.
- If resin becomes scratched or slightly frosted after multiple washings, rub with a few drops of vegetable or olive oil using a soft cloth and wash with mild soap and water to restore luster.
- Never use abrasive cleaners on resin.
- St. Clair is made of food-safe resin.
